LIGAMENT KNEE BRACING

Össur provides a broad range of both custom and off-the-shelf ligament knee bracing solutions, so you can address the full spectrum of patient needs.

Patients have different shapes, sizes and medical diagnoses. Their levels of physical activity also vary. That's why Össur offers the most diversified, premium product line available. With Össur ligament knee bracing, you can provide your patients with the technology and brace style that suits them best.

The cornerstone of the Össur ligament knee bracing product line is the trusted CTi® brand. Recognized as the "athlete's choice" for many high contact sports, CTi is based on a Total Support System. This proven system is incorporated in most of the ligament knee braces in the Össur product line.

For more information on the full line of Össur ligament knee braces, and further details on measuring, options and accessories, please request the Össur Ligament Knee Bracing Product Catalog (Part #P-530101), or visit www.ossur.com.

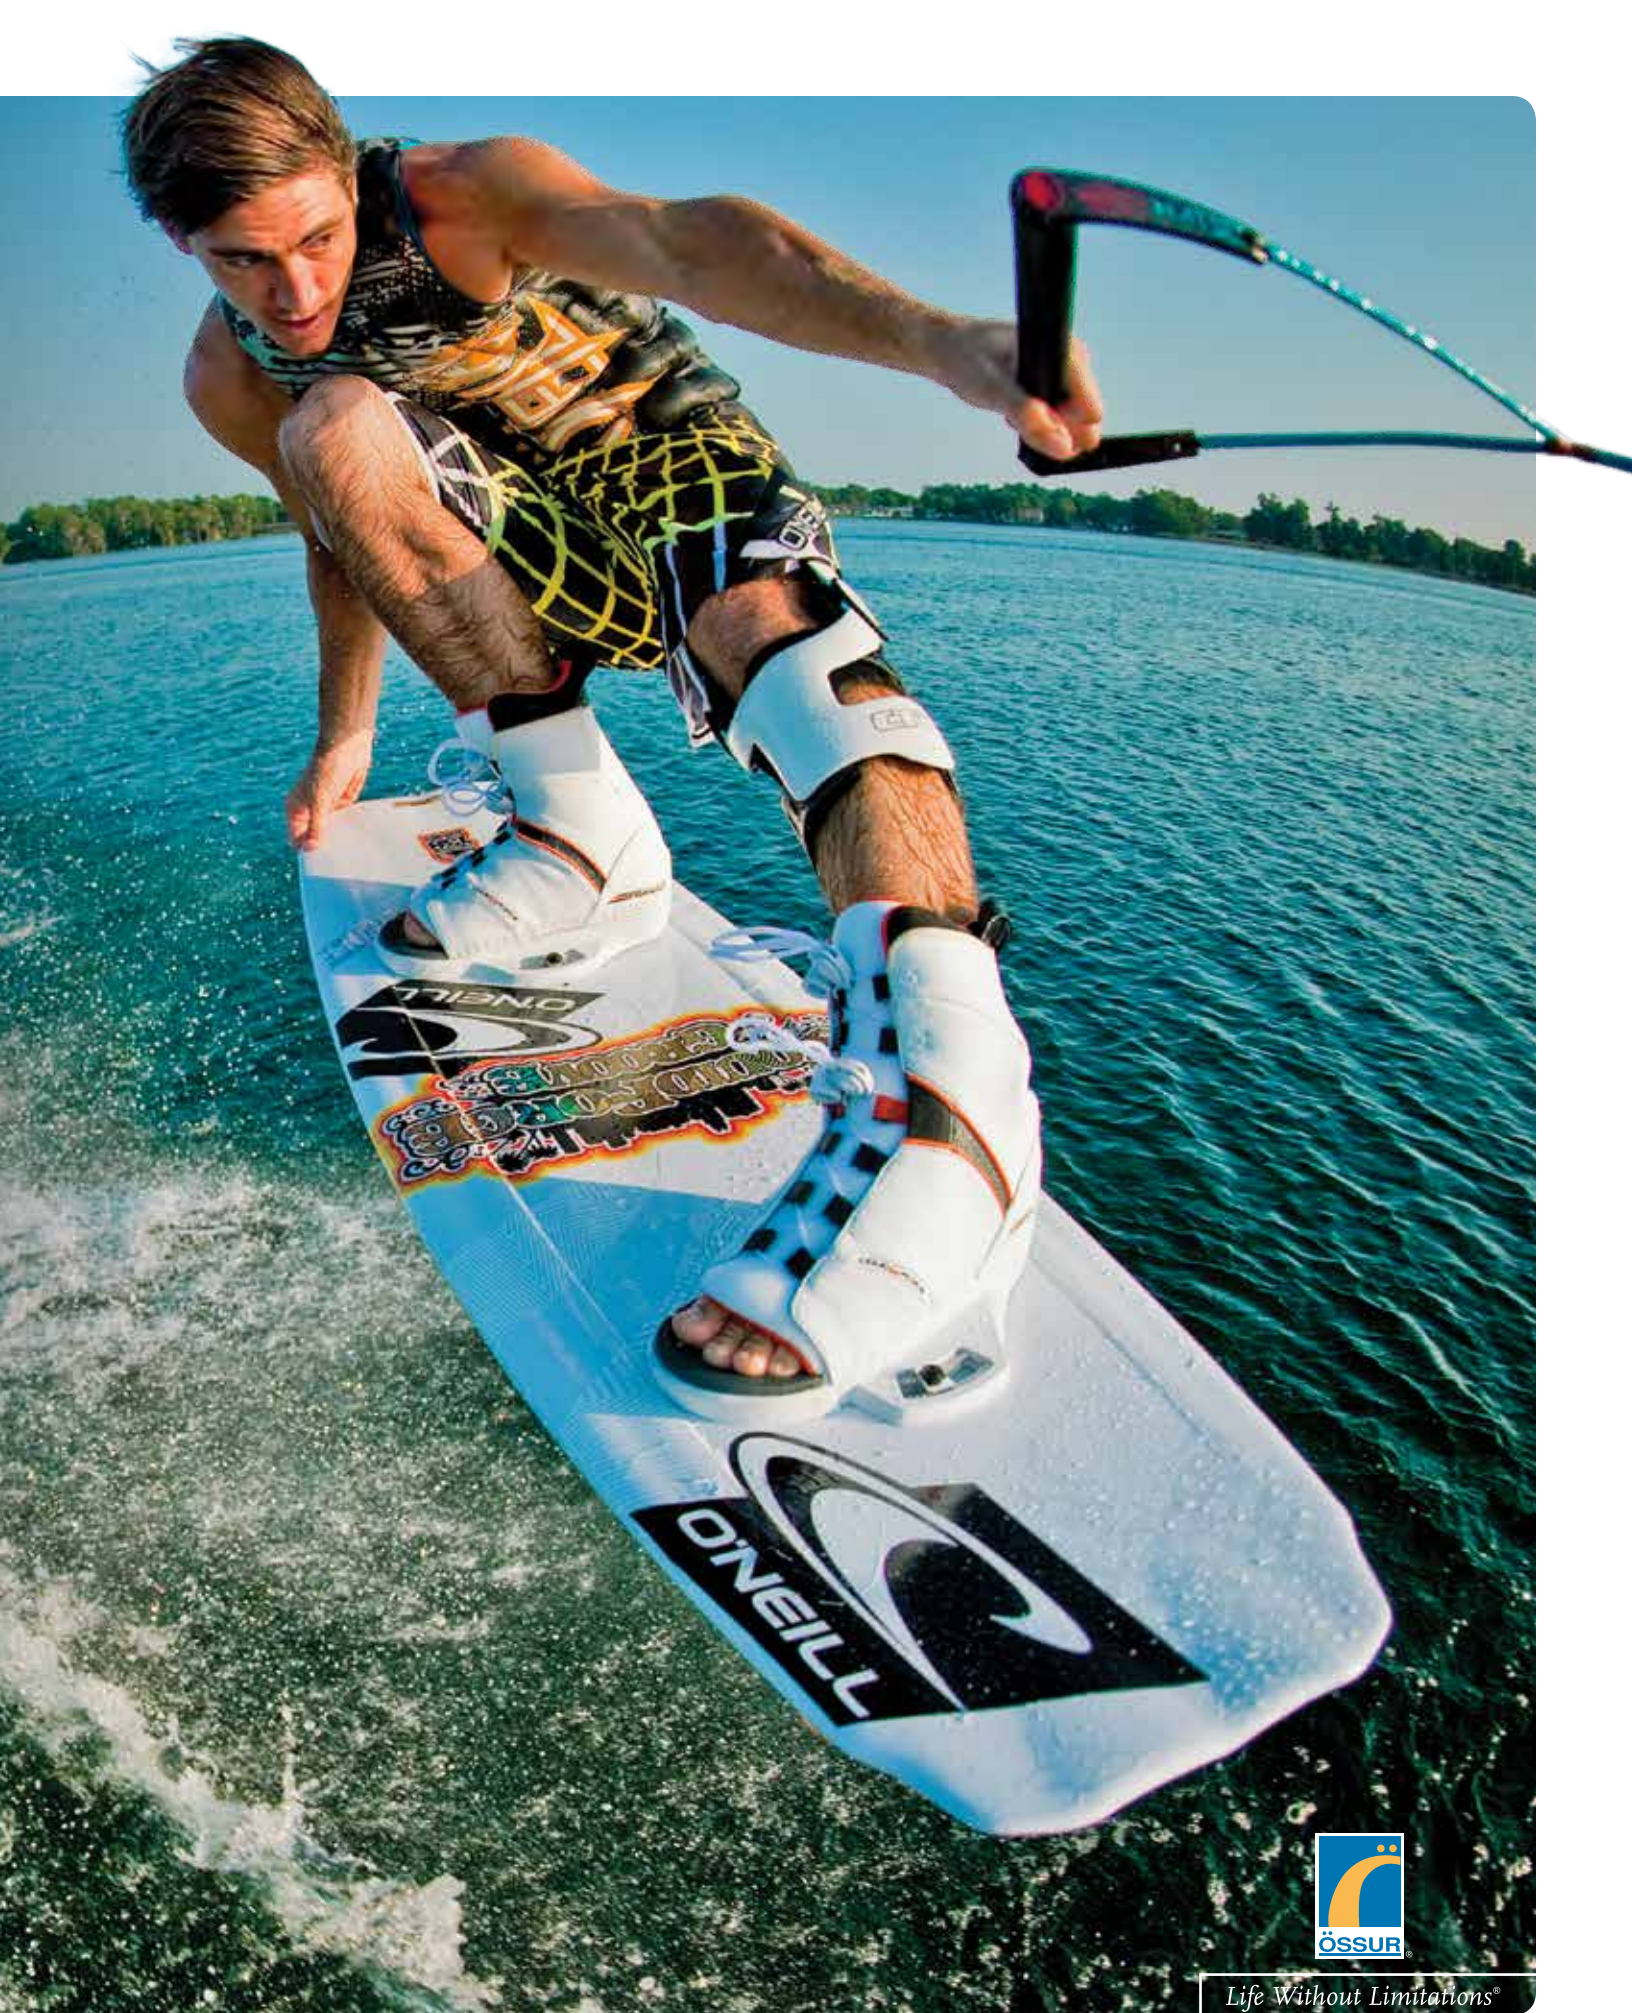

THE TOTAL SUPPORT SYSTEM

FOR ACL SUPPORT: the rigid tibial component of the frame and non-elastic upper cruciate strap stabilize the ACL.

FOR MCL & LCL SUPPORT: the rigid lateral arms on the brace frame, condylar support at the joint, non-elastic upper strap and lower medial cuff create a 6-point system to stabilize the MCL and LCL.

FOR PCL SUPPORT: the rigid femoral component of the frame and non-elastic lower cruciate strap stabilize the PCL.

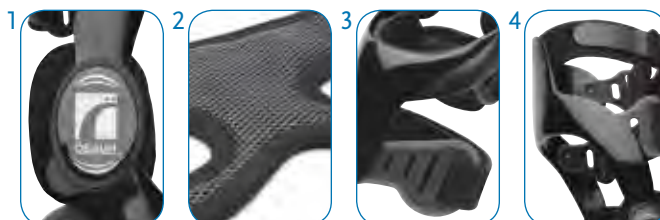

Life Without Limitations®

CTi® CUSTOM

CTi braces provide the ultimate combination of stabilization and protection of the knee joint. This truly custom-made brace uses Accutrac® hinges¹ with extension stops to glide with the knee and breathable liners coated with bio-inert Össur® Sensil® Silicone² to reduce migration and skin irritation. Flexible cuffs and buckles^{3,4} employ SensEdge overmolding to eliminate pressure points. CTi custom braces are available in 3 models — Vapor, Standard and Pro Sport — and can be further customized with a variety of options, colors, designs and/or accessories.

INDICATIONS

- ACL, MCL, LCL, PCL, rotary and combined instabilities
- Vapor model for low to medium impact levels
- Standard model for medium to high impact levels
- Pro Sport model for highest impact levels

ACCESSORIES

- See pages 11-13 for a complete listing of accessories

CTi® OTS

The proven technology of the classic CTi knee brace is available with off-the-shelf convenience. Outfitted with anatomically-correct Accutrac® hinges¹ and flexible cuffs² and buckles³, the rock-solid CTi carbon frame provides a rigid exoskeleton that stabilizes the knee joint. Breathable liners coated with bio-inert Össur® Sensil® Silicone⁴ ensure CTi OTS remains properly positioned on the leg, for optimal functional benefit.

INDICATIONS

- ACL, MCL, LCL, PCL, rotary and combined instabilities
- All activity levels
- Standard model for medium to high impact levels
- Pro Sport model for highest impact levels

MVP® CONTOUR | OTS

The MVP Contour is a versatile, low-profile, aluminum ligament knee brace that incorporates Össur's proven technology:

- The anterior (versus posterior) calf shell avoids a cumbersome "step through" design and features an Adjustable Tibial Strap¹ that captures the tibia
- Anatomically-correct Accutrak 2 hinges² mimic normal knee movement and prevent hyperextension
- Our proprietary Sensil® calf liner and strap padding³ reduce migration and ensure a comfortable fit

This new addition to our comprehensive line of ligament knee braces is ideal for a broad range of patients and activity levels.

INDICATIONS

- ACL, MCL, LCL, PCL, rotary and combined instabilities
- Mild to severe ligament laxity, sprain, or deficiency
- Protection and stabilization of ligaments after surgical repair or reconstruction

ACCESSORIES

- See pages 11-13 for a complete listing of accessories

PARADIGM® CUSTOM & OTS

Paradigm provides total ligament support via multiple points of leverage. The flared and contoured medial thigh shell¹ enhances patient comfort while the calf shell features an Adjustable Tibial Strap² that captures the tibia. A carbon fiber frame with flexible subshell assembly³ provides firm control, while accommodating individual variations in leg shape. Finally, polycentric hinges⁴ offer excellent structural soundness and durability.

INDICATIONS

- ACL, MCL, LCL, PCL, rotary and combined instabilities
- Protection and stabilization of surgical grafts

ACCESSORIES

- See pages 11-13 for a complete listing of accessories

TRAINER OTS

This cost-effective, single-upright brace is the perfect option to treat moderate MCL injuries, or mild combined ligament instabilities. With a diagonal Dynamic Force Strap¹ that tightens when the knee is extended, it resists valgus forces and minimizes axial rotation. Its carbon steel range-of-motion hinge² and injection-molded carbon shells³ are extremely durable, and an Adjustable Tibial Strap⁴ provides tibial capture and improved suspension. The Trainer is an excellent option for use in activities where a medial hinge may impede performance, or a padded shell covering is required.

INDICATIONS

- Mild to moderate ligament laxity and acute management of Grade I and Grade II MCL sprains
- Recommended for low to medium contact/impact

ACCESSORIES

- See pages 11-13 for a complete listing of accessories

FLEX® OTS

Flex is a viable post-op/functional rehab solution offering more versatility in both shape and function than most other options. Its heat-moldable, carbon composite frame accommodates edema and/or changes in leg shape during recovery from surgery, while its Accutrac® range-of-motion hinges provide flexion and extension control. Gel Fit™ condylar pads improve suspension and are comfortable for tender knees recovering from trauma.

INDICATIONS

- ACL, MCL, LCL, PCL, rotary and combined instabilities
- Long-term use for post-op, rehab and functional support
- Recommended for low to medium contact/impact

ACCESSORIES

- See pages 11-13 for a complete listing of accessories

C180 ROCKET OTS

With a condensed size and Accutrac™ hinges that are modified to more accurately track young knees, C180 Rocket provides support for children with ligament instabilities.

INDICATIONS

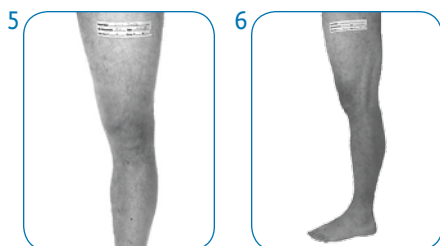

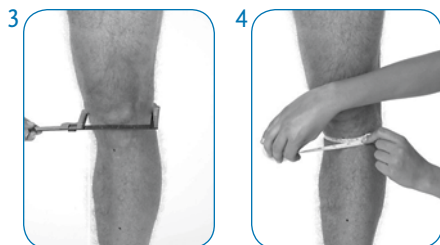

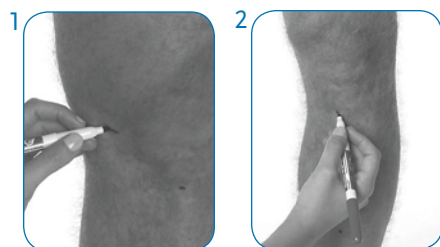

- ACL, MCL, LCL, PCL, rotary and combined instabilities
- Recommended for low to medium contact/impact
- Recommended for children

ACCESSORIES

- See pages 11-13 for a complete listing of accessories

¹ Caliper: M/L at joint width in a standard, weight-bearing position
Circumference: just below the distal border of the patella

All custom Össur ligament knee braces can be measured using either the Digital Measuring System (DMS), or Coordinate Cast System (CCS). You can also submit measurements via traditional casting, AOP, or CMS (CTi Only).

Digital Measuring System (DMS)

Photos can be taken with a digital camera or smartphone. If using a smartphone, it is suggested you download one of the free grid camera applications. This will help minimize angle distortion.

- Apply landmarks to the leg with a marker at the medial and lateral joint spaces¹ and a line along the tibial crest between the center of the tibial tuberosity² and 6" (15cm) below. Additional landmarks can be added for better accuracy during chart analysis (e.g., outline patella).
- With the patient in a weight-bearing position, obtain the M-L measurement at the joint space and record this value on the patient sticker³
- Measure circumference at 3" (7.5cm) and 6" (15cm) both above and below the patella⁴ and record these values on the patient sticker.
- Apply patient sticker 6" (15cm) above mid-patella for anterior view photo.
- If using a digital camera, adjust the height of the camera stand until the camera is level with the middle of the patella. If using a smartphone, aim and hold the phone so the lens is level with the middle of the patella.
- Move the camera stand (or smart phone) approximately 2-3 feet (61-91cm) away from the patient, capturing approximately 8" (20cm) both above and below mid-patella in the viewfinder⁵

NOTE: Align the camera with the leg to eliminate any internal or external rotation.

- Have the patient turn 90°, reapply patient sticker 6" (15cm) above joint line, and take a picture of the lateral view⁶
- Complete the Online Data Form at www.ossur.com/dms, attach the photos and submit.

Coordinate Cast System (CCS)

- With the patient in a weight-bearing position, use the calipers to obtain the M-L measurement at the joint space and record the value on the order form.
- Mark the patient's leg at mid-patella. Measure and mark 3", 6" and 8" above and below mid-patella.¹
- With the ankle held at 90 degrees, record the circumference in centimeters at each of the marked points from Step 1 above on the Custom Knee Brace order form.²

If measuring for a CTi brace:

Measure the patient's tibial alignment using the standing graduated slider³. At the mark 3" below mid-patella, bring the tool towards the lateral side of the calf until it just touches the skin. Slide the horizontal bar down until it just touches the tibial crest. Read the number on the horizontal bar at the point of intersection with the tibial crest. Repeat this at the mark 8" below mid-patella. Record these two measurements on the order form next to the 3" BELOW and 8" BELOW bubbles.

- Center the patient's leg with mid-patella mark on line 5 of the tracing board.⁴ You can use the centerline on the tracing tube to help align the mid-patella directly on line 5.

NOTE: If the patient has excessive tissue, use the knee center block to raise the knee off the board. This helps maintain a proper profile of the leg.

- At the top of the board, hold the base of the tracing device flat on the board with the pen tip facing the leg. Keep in contact with the leg while tracing the profile down to the bottom of the board.⁵
- Without moving the leg, repeat on the other side.
- On the Custom Knee Brace order form, record the number where the tracing line intersects each of the nine coordinates lines for sides A and B.

OSTEOARTHRITIS KNEE BRACING

Össur's osteoarthritis knee bracing line includes clinically-proven brace technology.

The Unloader,[®] popularized by GII,[®] is the foundation of our OA knee bracing product line. Its patented 3-Point Leverage System, which is used to unload the affected compartment, has continued to be the basis of our philosophy. However, the Unloader design has evolved along with breakthroughs in materials and engineering. Improvements in product efficacy and patient compliance have resulted in a level of patient success that is truly life-altering.

THE UNLOADER TREATMENT

Unloader braces provide pain relief to the affected side of the knee via a 3-Point Leverage System. The thigh and calf shells account for two points of leverage, while the Dynamic Force Strap (the diagonal strap above the knee) provides the third. This system "unloads" the pressure from the affected area, providing a reduction in pain. Regular use of the brace may even slow the degenerative process, as the area receives less load on a daily basis. **The biomechanical change in the knee is demonstrated by the x-rays shown below.**

Life Without Limitations®

UNLOADER ONE® CUSTOM & OTS

Unloader One® is a comfortable, lightweight, low-profile brace that provides excellent suspension and pain relief. This lightweight brace preserves the clinically-proven Össur® Unloader 3-Points of Leverage design by incorporating Dual Dynamic Force Straps¹ that are easily fine-tuned via the SmartDosing™ dial. ² Color-coded Quick Fit Buckles³ simplify application and removal, while flexible shells and breathable liners, coated with Össur Sensil® Silicone⁴, improve comfort and reduce migration, helping to ensure patient compliance.

Recent research demonstrates that Unloader One reduces pain, improves function and decreases the use of pain medication*:

INDICATIONS

- Mild to severe unicompartmental osteoarthritis
- Unicompartmental knee conditions requiring load reduction, such as Articular Cartilage Defect Repair, Meniscal Cartilage Repair, Avascular Necrosis, or Tibial Plateau Fracture
- Thigh circumferences of 13.5" to 29" (34.3cm to 73.5cm) and calf circumferences of 9.8" to 24" (24.9cm to 61.5cm)
- All non-contact activities

ACCESSORIES

- Unloader One now available in Doeskin
- See pages 25-27 for a complete listing of accessories

UNLOADER ONE® PLUS | CUSTOM & OTS

Many sufferers of OA knee pain are overweight. For these patients, containing excess soft tissue is essential for comfortable and effective bracing. That's why our new Unloader One Plus model features a wider thigh strap¹ than the standard version, plus a gastroc strap that helps secure the brace in place.² And because bigger legs require more support, we included a sturdier upright^{3,4} with an Adjustable Dynamic Joint, enabling additional leverage for optimal pain management. Multiple, peer-reviewed clinical and biomechanical studies have proven the efficacy of this technology.*

INDICATIONS

- Mild to severe unicompartmental osteoarthritis
- Unicompartmental knee conditions requiring load reduction, such as Articular Cartilage Defect Repair, Meniscal Cartilage Repair, Avascular Necrosis, or Tibial Plateau Fracture
- Thigh circumferences of 18" to 33" (45.7cm to 83.8cm) and calf circumferences of 14" to 24" (35.5cm to 61.5cm)
- All non-contact activities

ACCESSORIES

UNLOADER® XT CUSTOM

Few products have impacted an industry like Unloader XT, which was developed by GII® and made the Unloader brand synonymous with osteoarthritis knee bracing. Nine published, peer-reviewed clinical and bio-mechanical studies have proven the efficacy of the XT's unique 3-Point Leverage System, which combines an Adjustable Dynamic Joint^{1,2} with a diagonal Dynamic Force Strap³. A wide, elastic thigh strap makes application easy and helps contain soft tissue.⁴

INDICATIONS

- Mild to severe unicompartmental osteoarthritis
- Unicompartmental knee conditions requiring load reduction, such as Articular Cartilage Defect Repair, Meniscal Cartilage Repair, Avascular Necrosis, or Tibia Plateau Fracture
- Disproportionate thigh-to-calf girth, abnormal limb contour, thin skin, minimal muscle mass and/or mild cognitive deficiency
- Moderate to demanding activities of daily living

UNLOADER® LITE CUSTOM

The Lite is similar in function to the XT, but with uniquely-shaped shells made to fit smaller legs like a glove. With a lighter Adjustable Dynamic Joint™ (ADJ)^{1,2} that reduces the overall weight of the brace, Unloader Lite can be comfortably worn for long periods of time. The Dynamic Force Strap (DFS)³ applies a counteracting force to the adduction moment, while the Adjustable Tibial Strap (ATS)⁴ captures the tibia and enables adjustments in hinge depth for a more customized fit.

INDICATIONS

- Mild to severe unicompartmental osteoarthritis
- Unicompartmental knee conditions requiring load reduction, such as Articular Cartilage Defect Repair, Meniscal Cartilage Repair, Avascular Necrosis, or Tibial Plateau Fracture
- Thigh circumferences of 13" (34cm) to 26" (67cm) at 6" (15cm) above mid-patella and calf circumferences of 11" (28cm) to 17" (43cm) at 6" (15cm) below mid-patella
- Weight limit of 200lbs (not intended for obese or tall patients)
- Low to demanding activities of daily living

ACCESSORIES

- See pages 25-27 for a complete listing of accessories

CTi® OA CUSTOM

CTi® OA's composite shells can be constructed with up to 7° of varus or valgus correction, offering a high level of protection and stability for clinicians interested in treating osteoarthritis and ligament instability equally. Key features include a Total Support System, Accutrac® hinges¹ that mimic the natural motion of the knee joint and breathable liners, coated with Össur® Sensil® Silicone² to improve efficacy and virtually eliminate migration.

INDICATIONS

- Mild to severe unicompartmental osteoarthritis
- ACL, MCL, LCL, PCL, rotary and combined instabilities
- Vapor model for low to medium impact levels
- Standard model for medium to high impact levels
- Pro Sport model for highest impact levels

OASYS® OTS

OAsys® is a double upright brace that provides medial or lateral compartment unloading for the relief of OA knee pain, plus functional support for patients with ligament instability. Equipped with Accutrak® ROM hinges¹ and an Acculign™ slide bar² it is also suitable for post-op and long-term rehab [>4weeks] protocols requiring unloading and/or adjustable flexion/extension control. Quick-release buckles³ make OAsys easy to apply and remove.

INDICATIONS

- Medial or lateral compartment unloading for unicompartmental osteoarthritis or articular cartilage healing
- Post-op, rehab and functional support plus unloading for protocols requiring reduced medial or lateral joint loads during recovery
- Functional support with or without varus/valgus alignment
- ACL, MCL, LCL, PCL, rotary and combined instabilities
- Low and medium contact/impact activities

ACCESSORIES

- See pages 25-27 for a complete listing of accessories

Small Right Champagne = OA3CHSR

Small Right Clear Carbon = OA3CSR

2 Caliper: M/L at joint width in a standard, weight-bearing position
Circumference: just below the distal border of the patella

UNLOADER® SPIRIT | OTS

Unloader Spirit is an off-the-shelf OA knee brace with customizable attributes. Its lightweight shells can be moderately adjusted for differences in patient anatomy and its Adjustable Dynamic Joint™^{1,2} accommodates a wide range of varus/valgus alignments. Removable liners and trimmable straps and pads ensure comfort, while the Dynamic Force Strap³, standard on all Unloader braces, enables on-the-fly adjustability in the amount of unloading force.

INDICATIONS

- Mild to severe unicompartmental osteoarthritis
- Unicompartmental knee conditions requiring load reduction, such as Articular Cartilage Defect Repair, Meniscal Cartilage Repair, Avascular Necrosis, or Tibia Plateau Fracture
- Proportionate height-to-weight, moderately proportionate thigh-to-calf girth and moderate varus/valgus angulation
- Thigh circumferences of 13.5" (34.3cm) to 26.5" (67cm) at 6" (15cm) above mid-patella
- Low to moderate activities of daily living

TRAINER OA | OTS

Trainer OA is a cost-effective, easy-to-fit solution for patients with mild to moderate unicompartmental knee osteoarthritis (OA). With a diagonal Dynamic Force Strap¹ that tightens when the knee is extended, Trainer OA is designed to resist either varus or valgus forces while minimizing axial rotation. Its aluminum range-of-motion hinge² and injection-molded carbon shells³ are extremely durable for protection, yet malleable for customized fitting. An Adjustable Tibial Strap⁴ captures the tibia for improved suspension and enables fine-tuned control over hinge depth for a more comfortable fit. A Coolflex™ sleeve provides breathable compression and comfort.

INDICATIONS

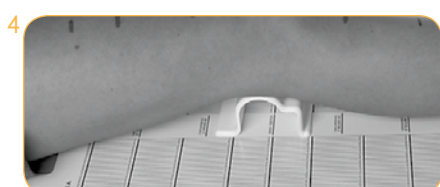

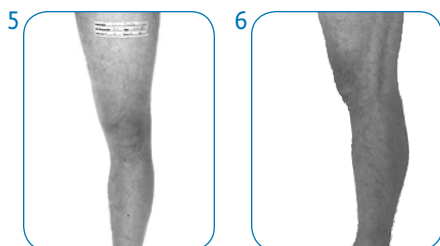

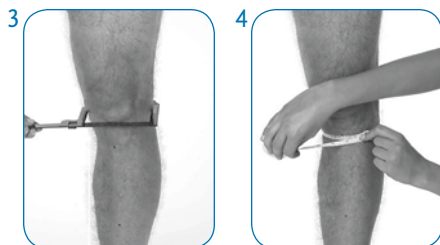

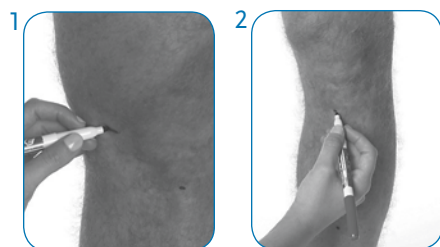

- Mild to moderate unicompartmental knee osteoarthritis
- For patients who prefer a "soft" brace
- For patients who have mild impairment of cognitive and/or manual dexterity
- Recommended for low to medium contact/impact

 Dynamic
 Force Strap®

All custom Össur osteoarthritis knee braces can be measured using either the Digital Measuring System (DMS), or Coordinate Cast System (CCS). You can also submit measurements via traditional casting, AOP, or CMS (CTi only).

Digital Measuring System (DMS)

Photos can be taken with a digital camera or smartphone. If using a smartphone, it is suggested you download one of the free grid camera applications. This will help minimize angle distortion.

- Apply landmarks to the leg with a marker at the medial and lateral joint spaces¹ and a line along the tibial crest between the center of the tibial tuberosity² and 6" (15cm) below. Additional landmarks can be added for better accuracy during chart analysis (e.g., outline patella).
- With the patient in a weight-bearing position, obtain the M-L measurement at the joint space and record this value on the patient sticker³
- Measure circumference at 3" (7.5cm) and 6" (15cm) both above and below the patella⁴ and record these values on the patient sticker.
- Apply patient sticker 6" (15cm) above mid-patella for anterior view photo.
- If using a digital camera, adjust the height of the camera stand until the camera is level with the middle of the patella. If using a smartphone, aim and hold the phone so the lens is level with the middle of the patella.
- Move the camera stand (or smart phone) approximately 2-3 feet (61-91cm) away from the patient, capturing approximately 8" (20cm) both above and below mid-patella in the viewfinder⁵

NOTE: Align the camera with the leg to eliminate any internal or external rotation.

- Have the patient turn 90°, reapply patient sticker 6" (15cm) above joint line, and take a picture of the lateral view⁶
- Complete the Online Data Form at www.ossur.com/dms, attach the photos and submit.

Coordinate Cast System (CCS)

- With the patient in a weight-bearing position, use the calipers to obtain the M-L measurement at the joint space and record the value on the order form.
- Mark the patient's leg at mid-patella. Measure and mark 3", 6" and 8" above and below mid-patella.¹
- With the ankle held at 90 degrees, record the circumference in centimeters at each of the marked points from Step 1 above on the Custom Knee Brace order form.²

If measuring for a CTi brace:

Measure the patient's tibial alignment using the standing graduated slider.³ At the mark 3" below mid-patella, bring the tool towards the lateral side of the calf until it just touches the skin. Slide the horizontal bar down until it just touches the tibial crest. Read the number on the horizontal bar at the point of intersection with the tibial crest. Repeat this at the mark 8" below mid-patella. Record these two measurements on the order form next to the 3" BELOW and 8" BELOW bubbles.

- Center the patient's leg with mid-patella mark on line 5 of the tracing board.⁴ You can use the centerline on the tracing tube to help align the mid-patella directly on line 5.

NOTE: If the patient has excessive tissue, use the knee center block to raise the knee off the board. This helps maintain a proper profile of the leg.

- At the top of the board, hold the base of the tracing device flat on the board with the pen tip facing the leg. Keep in contact with the leg while tracing the profile down to the bottom of the board.⁵
- Without moving the leg, repeat on the other side.
- On the Custom Knee Brace order form, record the number where the tracing line intersects each of the nine coordinates lines for sides A and B.

LOWER EXTREMITY BRACES & SUPPORTS

Life Without Limitations®

REBOUND® AIR WALKER

- Linked medial and lateral air bladders with a single inflation point provide balanced compression and are shaped to cradle the Achilles, holding the heel in place
- Moisture-wicking softgood helps keep skin dry and comfortable
- Straps fasten in front for easy application, adjustment and removal
- EVA material provides greater shock absorption in the heel

- 1 Fully-integrated air pump and release valve provides easy, tool-free inflation and deflation for fine-tuned, consistent compression
- 2 Flex Edge™ overmolding conforms to each patient's unique anatomy to help limit the formation of pressure points
- 3 Rocker bottom promotes a natural, stable gait, while a trimmable, semi-soft toe bumper provides added protection
- 4 Ventilated panels wick moisture to prevent microbial buildup and improve patient comfort

INDICATIONS

Grade 2 and 3 ankle sprains, stable fractures, post-operative use, trauma, or rehab use

Pediatric Walker

PEDIATRIC WALKER

Pediatric Cam Walkers are designed to stabilize and protect the lower leg, ankle and foot. They are easy to operate and comfortable to wear, making them ideal for an active child who requires stability following a sprain, stress fracture, or surgery.

- High quality rigid outer skeleton for protection
- Dense foam lining within the sole to provide comfort and support
- Shock absorbing sole to improve comfort and protects the user from slips, providing additional security in each step
- Rocker bottom to stimulate natural gait
- Uprights give additional stability by restricting motion of the leg
- Lightweight design perfectly designed for kids to keep active

REBOUND® ANKLE BRACE

The Rebound hinged ankle brace offers more stability than soft ankle supports, and is perfect for transitioning out of a walker boot. Application is simple and reduces plantar flexion, making it ideal for patients with limited range of motion. The low-profile design is comfortable and fits easily in most shoes.

- 1 Width adjustability creates a better fit and reduces inventory
- 2 Front closure system facilitates simple and secure application
- 3 Optional Stability Strap provides:
 - extra support while requiring less plantar flexion than comparable products
 - numerous strapping configurations for a range of stability levels

INDICATIONS

- Recommended for ankle injury rehabilitation of grade I, II, III and high ankle sprains and strains
- For transition from walker boot or cast to daily activities or sports after an injury
- Support for chronic instability following rehabilitation
- Prophylactic use

GAMEDAY® ANKLE BRACE

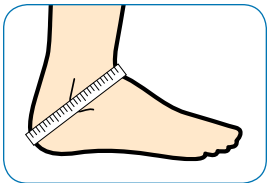

- Durable ballistic nylon shell with inner non-slip coating adds support by reducing slippage
- Optional semi-rigid stays provide additional support and stability
- Easy to lace up and adjust without shoe removal
- Figure-8 straps mimic athletic taping for inversion/eversion support
- Circumferential elastic cuff contains loose laces and provides support/stability, compression and pain relief
- Low-profile, streamlined design is comfortable and fits easily in athletic shoes

INDICATIONS

- Ankle injury rehabilitation/immobilization (Grade I/II sprains)
- Support chronic instability
- Prophylactic use

FORM FIT® ANKLE BRACE

- The Form Fit's ankle brace's advanced design provides the compression and comfort of a soft ankle with 20 - 35% more protection than traditional stirrups
- Option of Figure-8 heel lock strapping performs consistently, unlike taping that stretches over time
- Speed laced design provides the option of a quick lace up
- Aerospacer base material for comfort and breathability
- Embedded stirrups provide excellent inversion/eversion support
- Pull loops simplify application

AIRFORM® STIRRUP ANKLE BRACES

Our Airform Ankle product family offers three different/unique alternatives for the pneumatic treatment of acute ankle injuries. All three Airform products utilize our “Flex-Edge” technology to eliminate the pressure points caused by traditional stirrups and create a more comfortable experience for patients.

INDICATIONS

- Acute ankle injuries
- Post-cast and post-walker support
- Chronic instability

Airform Universal Inflatable

- Universal design fits both left and right ankles, reducing inventory
- Soft Flex-Edges provide a universal fit without sacrificing comfort or stability
- Inflatable air bladders provide adjustable pneumatic compression
- Adjustable heel strap allows for easy width adjustment

EXOFORM® DORSAL NIGHT SPLINT

- Adjustable aluminum stay inside dorsal shell allows modification in the angle of dorsiflexion
- Soft, overmolded edges enhance comfort
- Hinged shell at the calf area prevents brace rotation
- Semi-rigid plantar pad reduces discomfort along the sides of the foot while providing an improved angle of dorsiflexion
- Non-slip surface on plantar pad prevents slipping during normal walking
- Circumferential heel and posterior strapping prevents migration while increasing overall comfort and effectiveness
- Strapping and shell perforations improve comfort and breathability

- 1 Integrated support shell with adjustable aluminum stay maintains the therapeutic angle of the foot and lower leg at 85° to 90°
- 2 Flex Edge™ overmolding eliminates pressure points and discomfort while protecting sleeping partners
- 3 Full calf and heel strapping holds the foot in the desired angle and eliminates rotation and migration of the product
- 4 Thermoformed Form Fit® padding on the inside of the soft good improves patient comfort

INDICATIONS

Ideal for Plantar Fasciitis, Achilles Tendonitis, Drop Foot and Post-Static Pain

FORM FIT® NIGHT SPLINT

- Adjustable flexion straps provide a gentle stretching of the plantar fascia and achilles tendon. Adjusts from 0°-10° dorsiflexion
- Patented 3-dimensional molding creates superior comfort and fit with padding where you need it
- Soft, lycra-lined foam interior is plush, washable and breathable to eliminate heat build-up
- Lycra-lined, foam-padded straps maintain comfort across the flexor tendons
- User-friendly, center-release buckles simplify application
- Lightweight, low-profile shell is sturdy and breathable

INDICATIONS

Ideal for Plantar Fasciitis, Achilles Tendonitis and other lower extremity overuse injuries

AFO DYNAMIC

AFO Dynamic incorporates Össur Flex-Foot® technology and the energy storing properties of carbon fiber. The result is a strong, lightweight solution for people with varying degrees of drop foot.

- Carbon fiber design provides excellent strength-to-weight ratio and dynamic motion
- The tapered carbon heel stores energy and manages forces at heel strike
- Full-length toe lever provides full support while foot is loaded, as well as reduced shock to the contralateral limb
- Controlled plantar flexion at initial contact
- Creates M-L stability at mid-stance
- Reduces energy consumption by reducing hip hike
- Medial strut makes it less visible in shoe
- Open anterior tibia shell provides superior anatomical fit, and reduces heat and perspiration

INDICATIONS

- Drop foot secondary to CVA, MS, Charcot Marie Tooth disease, other neurological conditions, or mild knee instability
- Contra-indicated for severe ankle-foot deformities, severe spasticity, or fluctuation edema
- Suggested weight range: up to 265 lbs (120kg)

AFO LIGHT

AFO Light provides support only where it is needed, eliminating unnecessary bulk and providing a cosmetically appealing look. Using the best of Flex-Foot® technology and the energy storing properties of carbon fiber, AFO Light offers a strong and lightweight solution for people with mild to moderate drop foot.

- Energy return and propulsion assistance of the limb at toe off
- Supports the foot for ground clearance during swing phase
- Carbon fiber design provides excellent strength-to-weight ratio and dynamic motion
- Gradual plantar flexion at initial contact
- Stiffness gradient at the heel and the toe correspond to ground reaction forces as they are applied to the foot
- Easy to don and doff

INDICATIONS

- Mild to moderate drop foot
- Contra-indicated for severe ankle-foot deformities, severe spasticity, fluctuation edema, M-L instability, or extreme activity
- Suggested weight range: up to 220 lbs (100kg)

O-122101 AFO Light Accessory Kit*

*AFO Light Accessory Kit includes strut padding, strut hook-and-loop, shrink tube, calf piece, calf piece padding, calf piece light hook-and-loop, light strap, light elastic band and silicone padding kit.

AFO LEAF SPRING

AFO Leaf Spring is a pre-fabricated polypropylene ankle-foot orthosis designed to support flaccid drop foot. It provides a semi-rigid section for toe clearance and support, yet has a thin, flexible foot plate for easy trimming. The absence of a heel section makes the Leaf Spring more comfortable to wear and provides a better fit in shoes.

- Injection-molded polypropylene is lightweight
- Variable thickness throughout the orthosis provides strength
- Provides good toe clearance and support
- Thin, flexible foot part is easy to trim with a pair of scissors
- Excellent fit for most types of shoes
- Absence of heel section for improved comfort

INDICATIONS

- Drop foot secondary to CVA
- Mild drop foot secondary to other neurological pathologies

FOOT-UP

Foot-up is a lightweight ankle-foot orthosis that offers dynamic support for drop foot or similar complaints. This revolutionary orthosis provides visible improvement in gait by supporting the foot the moment it is raised.

- Cushioned ankle wrap is made from a breathable, 3-layer material that can be worn comfortably for long periods of time
- Plastic inlay fits discreetly between the tongue and laces of the shoe and is practically invisible when worn

INDICATIONS

Dynamic support for drop foot or similar complaints for which support of dorsiflexion is desirable

INNOVATOR DLX®+

The simple, versatile post-operative knee bracing solution that is easy for everyone!

- OneTouch™ hinge for ease of adjustment
- Reusable ROM locks for easy, accurate and quick fitting that ensures patient compliance
- Quick release buckles for easy donning and doffing
- Brace expander assists fit and increases staff efficiency
- Lockout at -10°
- Available in both a full soft good version and a cool version

- 1 OneTouch™ drop lock button
- 2 Simply press, rotate and release flexion/extension settings
- 3 OneTouch™ lever enables easy release for slide-to-size length adjustments from 18" to 27"
- 4 Comfortable, built-in Anti Migration System (AMS) helps keep the brace in the proper position

REHAB

The Contour is designed to fit specifically the right or left leg, and can be ordered in either a long or short model. The Universal model is standard to fit both left and right. Both are available with breathable “Air Light” padding or tissue controlling “Full Foam”.

- Patient comfort with the cool and breathable Air Light design
- Warmth and maximum tissue control via Full Foam model
- Yellow strap tabs allow quick brace placement and adjustment
- Push-button system for easy length adjustment
- ROM control in 15° increments: Flexion 0°-105°, Extension 15°-90°
- Low profile: fits easily under clothing

INDICATIONS

- For post-operative and post-injury rehabilitation
- Suggested weight range: up to 250 lbs

**EXOFORM®
KNEE IMMOBILIZER**

The Exoform Knee Immobilizer is the most adjustable knee immobilizer available. Össur's unique Slide-to-Size™ approach enables the care provider to fit the widest variety of patients. This allows you to reduce your inventory. The Exoform's unique posterior stay and dual-cuff design delivers greater immobilization compared to the old-style softgood approach.

- Slide-to-size adjustment enables you to provide the right fit for the largest variety of patient lengths and widths
- Dual-cuff design leads to the greatest immobilization
- Popliteal pad provides superior fit and limits migration
- Perforated padded liner for breathability and comfort
- Cool foam version can be worn directly against the skin for greater comfort on warm days
- Full foam version provides warmth and compression
- Uncompromising durability
- Easy to fit patient quickly

REBOUND® KNEE BRACE. NOTHING COMPARES.

Breathe freely.

Featuring our unique, 3-layer Cooltech™ fabric, the Rebound Knee Brace is highly breathable, reduces heat retention and dries ultrafast.

Popliteal comfort.

The Rebound Knee Brace stretches in extension and relaxes back to its natural shape in flexion, minimizing the popliteal bunching that causes skin irritation in other products.

Patella support included.

A removable, universal patella buttress is included with every sleeve version of the Rebound Knee Brace for easy, customizable patellar support, whenever necessary.

Control where it counts.

Dual lower cruciate straps enable fine-tuned control of the anterior-posterior hinge placement and cinch the Rebound Knee Brace above the gastroc to reduce migration.

Strap it your way.

The reversible strapping of the Rebound Knee Brace can be set up to pull laterally-to-medially, medially-to-laterally, or a combination of both, depending on your specific objectives.

COVERING ALL THE BASES

WITH SIX VARIATIONS TO CHOOSE FROM, ÖSSUR'S REBOUND HINGED KNEE BRACE PRODUCT LINE IS A COMPREHENSIVE PORTFOLIO OF HIGH-QUALITY BRACES DESIGNED TO SERVE THE NEEDS OF A BROAD RANGE OF PATIENTS.

REBOUND KNEE BRACE ORDERING INFORMATION

Indications

ROM Hinge Models: Mild to moderate ACL and/or PCL, MCL and LCL instabilities, sprains and strains.

Non-ROM Hinge Models: Mild medial/lateral knee instabilities.

FX™ PATELLA STABILIZER

The FX keeps the patella tracking properly through the full range of motion. The breathable Coolflex sleeve minimizes heat and perspiration while anchoring the brace firmly to the leg.

- Offers superior patellar tracking through a combination of maximum coronal plane control and minimal flexion and extension resistance
- The detachable thigh strap provides a customizable fit. Additionally, the coronal adjuster allows for further specific fit
- The patented stabilizer offers superior control and assists in restoring normal kinematics to the joint
- Breathable Coolflex sleeve minimizes heat and perspiration

INDICATIONS

Ideal for Patellofemoral Pain Syndrome, Patellofemoral Stress Syndrome (Runner's Knee), Patellar Subluxation/Dislocation, Chondromalacia, Patellar Tendinopathy (Tendonitis or Jumper's Knee), Arthritis and Osgood-Schlatter disease.

Prefabricated product available in:

- Sizes XS to 2XL
- Osgood-Schlatter version

ULTRAWRAP™

- Standard UltraWrap model features Accutrac hinges with semi-rigid uprights and interchangeable extension stop
- UltraWrap ROM model features Accutrac ROM hinges with semi-rigid uprights and easy-to-use flexion/extension stops
- Textured interior grips skin surface to reduce migration and stimulate neuroreceptors
- Removable, semi-rigid uprights provide medial/lateral support
- Ultra-soft, form-fitting Neoprene hybrid provides superior comfort and contours to the leg
- Elastic-bound garment for better fit, compression and durability
- Non-binding, breathable popliteal cutout improves comfort

INDICATIONS

- Mild to moderate strains or sprains of the ACL, MCL, LCL & PCL
- Warmth, compression and proprioception
- UltraWrap ROM model for support with flexion/extension control
- Sturdy posterior, medial and lateral supports

PART#	ROM PART #	SIZE	MEASUREMENTS*
UWXS	UWXSROM	XSmall	12-13"
UWS	UWSROM	Small	13-14"

UPPER EXTREMITY BRACES & SUPPORTS

Life Without Limitations®

FORM FIT® UNIVERSAL WRIST/THUMB

Treat a broad range of patients with an easy to use and convertible wrist or wrist/thumb brace!

- Quickly and easily converts from right to left configuration reducing inventory
- Universal sizing fits a broad range of patients
- Constructed of breathable felt material for increased comfort
- Malleable Thumb Supports allow desired thumb position for improved thumb stability

- 1 Single pull closure system allow for quick and easy adjustment
- 2 Lateral hand stabilizer allows a more custom fit and enhances ulnar deviation control
- 3 Available in pediatric sizes

INDICATIONS

- Mild to moderate sprains and strains
- Tendonitis
- Selected injuries
- Post-cast healing
- Gamekeeper's thumb¹
- DeQuervain's tendonitis¹
- Selected scaphoid injuries¹
- Other selected soft tissue injuries

SPECTRA™ WRIST

The Spectra wrist brace is designed to immobilize the wrist at a neutral angle. Its single-pull lacing closure makes it easier to apply than a conventional wrist brace, meeting the needs of patients with arthritis and other hand dexterity issues.

- Wicking liner moves moisture away from the skin for increased comfort

- 1 Single-pull lace closure enables easy application
- 2 Adjustable webspace strap allows size adjustment for increased comfort
- 3 Removable/adjustable palmar stay provides adjustability of immobilization angle
- 4 Suede soft good material is durable and breathable

INDICATIONS

Mild to moderate sprains and strains, Tendonitis, Carpal Tunnel and other repetitive stress injuries, post cast healing and soft tissue injuries.

Exoform Carpal Tunnel Wrist

EXOFORM® CARPAL TUNNEL WRIST

- Lightweight low profile design
- 20% less circumferential bulk than other brands
- More room at base of the thumb, palmar crease and 5th MP for full MP flexion
- Contoured for an anatomically correct fit
- Designed to provide smooth controlled resistance to extreme range of motion
- Preshaped into a neutral position for comfortable limited motion/flexibility
- Provides radial and ulnar styloid relief
- "Soft touch" web space is cushioned and 40% thinner than other brands
- Interior is 3-dimensionally molded to enhance comfort

INDICATIONS

- Carpal Tunnel Syndrome
- Tendonitis

Oval-8 kit

OVAL-8® FINGER SPLINTS

Treat six of the most common finger conditions with just one splint

Oval-8 finger splints stabilize and align the PIP and DIP joints. With a simple turn of the splint, each Oval-8 finger splint can be used six different ways to treat tendon or ligament injuries, protect healing fractures, control unstable joints, prevent contractures and more.

3PP® BUDDY LOOPS®

Eliminates the mess and inconvenience of tape and provides all of the advantages of secure, reusable finger protection.

The single loop design makes these easy and fast to apply. Non-slip foam lining clings to the skin to prevent slipping. Use to wrap two or more fingers and simply angle the wrap to accommodate the 4th and 5th fingers. Available in 1/2" and 1" width. Machine washable fabric is ideal for long term use.

Innovator X Post-op Elbow Brace with optional arm bar accessory kit

OneTouch button enables easy release for slide-to-size length adjustments

INNOVATOR X® POST-OP ELBOW

Benefiting from our proven, patented technologies, Innovator X, with extending struts, can help improve patient outcomes. With superior comfort, clean aesthetics and the most user-friendly hinge in post-op bracing, Innovator X was designed to increase patient satisfaction and compliance.

- Patented Form Fit® 3-dimensional padding and Lycra® lining improve fit and comfort
- Comfort pad at the neck and shoulder
- Optional arm bar accessory kit provides anti-supination/pronation control during use

- 1 OneTouch button enables easy release for slide-to-size length adjustments
- 2 Easy-to-use Innovator hinge makes flexion and extension adjustments simple
- 3 Sensil® silicone padding on straps reduces migration for an improved fit and increased stability
- 4 Malleable aluminum cuffs allow customization for increased fit and support

INDICATIONS

- Post elbow surgery: elbow reconstruction, ligament and tendon repairs, surgical repair of a fracture and biceps repair
- Stable fractures
- Mild to severe soft tissue injuries

SMARTSLING®

In association with key industry opinion leaders, SmartSling was designed to fulfill three fundamental objectives: versatility, comfort, and ease of application. SmartSling's dynamic 3-in-1 design provides immobilization, abduction, and/or external rotation, resulting in reduced stocking and inventory management costs. SoftEdge™ strapping, a breathable mesh base material and a gusseted, chamois-covered neck pad combine to increase patient comfort. Quick-release buckles and trimmable, "no fray" strapping allow quick and customized fitting. Versatile. Comfortable. Easy. SmartSling.

- Only 3 sizes/parts to stock (product is right/left universal)
- Low-profile, streamlined fit and contemporary, sporty look improve patient comfort and compliance

- 1 Gusseted chamois neck pad contours to patient anatomy for improved comfort
- 2 Quick-release buckles for easier application and removal
- 3 Re-positionable thumb loops for improved fit and comfort
- 4 Included, optional axilla pillow helps distribute weight over a larger surface area and decreases pressure on the ulnar nerve

INDICATIONS

- Immobilization for rotator cuff repairs
- Bankart repairs
- Capsular shifts
- Glenohumeral dislocations/subluxation
- Soft tissue repairs/strains
- Shoulder instabilities/injuries

NECK/CERVICAL, BACK & HIP BRACES

Life Without Limitations®

MIAMI J® CERVICAL COLLAR

Known as the superior c-spine immobilizer on the market through multiple independent studies, the Miami J Collar's patented design meets the specialized needs of all those afflicted with cervical injuries. The Miami J offers features that enhance compliance and help speed recovery while ensuring immobilization, inhibition of skin breakdown and patient comfort.

- Sorbatex™ padding is antibacterial and clinically proven to inhibit microbial growth, which enhances comfort and helps assure patient compliance
- Bioengineered to minimize pressure points in key known areas; chin, occiput, trapezius and clavicle
- Sizing based on 6 phenotypes to assure proper fit and optimum immobilization
- Comfort adjustment buttons for occiput and mandible, removable sternal pad for supine and swallowing

Collar Sets & Accessories (see Phenotype-driven sizing system below)

COLLAR	COLLAR SET	REPLACEMENT PADS	SIZE
MJ-200S	MJR-200S	MJP-100	Super Short/Kyphotic*

MJ-300FRT	MJ-300BK	Short

Miami J Front and Back Panels may be interchanged to accommodate patient anatomy, e.g., a Small Front may be used with a Large Back.

Choose collar size based on patient neck height, not patient body size.

* Super Short/Kyphotic collars are packaged with Medium Back Panels.

PHENOTYPE SIZING CHART

Specialty sizes: 30% of the population

Phenotype-driven sizing system makes size selection simple while drastically reducing margin of error in fitting a patient. Each collar has a bioengineered front with a specific back designed to work together for superior immobilization.

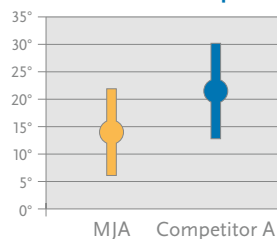

MIAMI J[®] ADVANCED. SUPERIOR IMMOBILIZATION. CONVENIENT ADJUSTABILITY.

Size it up.

Coupling the same phenotype-driven system of the traditional Miami J with adjustable sizing, Miami J Advanced enables you to reduce your inventory without sacrificing a precise fit.

Miami J Advanced limits flexion more than the competition*

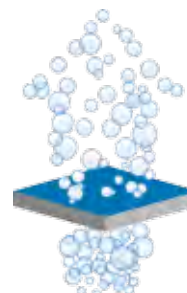

Best in class.

Miami J Advanced is the only adjustable cervical collar that provides the clinically-proven superior immobilization you expect from a Miami J product.

* Data on file at Össur

Avoid breakdown.

Miami J Advanced combines soft, overmolded edges and breathable Sorbatex[™] padding (see back panel) to inhibit skin breakdown and the formation of dangerous pressure points.

Less is more.

Two distinctly-shaped pads — just one each for the front and back of the collar — makes skin care with the Miami J Advanced simple and intuitive.

OCCIAN® BACK

The Occian Back is designed exclusively for the specialized needs of the multi-system trauma patient in the ICU. Universally-sized, specifically engineered and designed with advanced, Intuitech™ pressure-relieving memory foam, the Occian Back helps caregivers manage c-spine patients who are at high risk of occipital breakdown, including:

- Patients not awake and alert within 24-48 hours after admission
- Patients with pre-existing skin injuries and/or lacerations to the head/neck
- Burn patients who must wear a collar
- Elective surgery patients desiring nighttime post-op comfort

PHILADELPHIA® ADJUSTABLE TRACHEOTOMY COLLAR

The Philadelphia® Tracheotomy Collar has been an industry standard for decades. Now, Össur, the manufacturers of the Miami J and Miami J Advanced, is proud to unveil Philadelphia Adjustable. Constructed from the same high-quality materials as the original, Philly Adjustable combines convenient size adjustability with immobilization and comfort.

ADJUSTABILITY

- Fit 95% of patients with a single SKU.
- Anterior height adjustability covers sizes 2 ¼, 3 ¼ and 4 ¼.
- Tear-off tabs accommodate neck circumferences from 10 to 19 inches.

PROTECTION

- Restricts cervical spine flexion, extension and rotation comparably to the original Philly collar.
- Adjustable bilateral fasteners ensure proper fit.
- Total cervical arch support maintains neutral alignment of the c-spine.

COMFORT

- Two-piece design enhances patient comfort.
- Conforms to shoulder and mandible contours for stability and comfort.
- Ventilation openings reduce heat and moisture.

HOSPITAL SAFE

- Latex-free, non-toxic and hypoallergenic Plastazote® foam helps reduce skin irritation.
- Water-resistant for bathing and aqua-therapy.
- X-ray, CT and MRI lucent.
- Clean with mild soap and water.

MIAMI LUMBAR.®

A NEW LSO

FROM THE MAKERS

OF THE MIAMI J®

CERVICAL COLLAR.

Because backs aren't flat.

The human anatomy is curved. Which is why both the Miami Lumbar belt itself and its various support panels are sculpted to hug the contours of the back, improving comfort, stabilization and compliance.

It's cool to be cool.

Breathable Aerospacer fabric and ventilated support panels combine to keep Miami Lumbar cool and comfortable to wear for extended periods of time.

Step right up. Or, down.

The trimmable belt combines with heat-moldable anterior and posterior panels to create a customizable, modular system. Step up, or down, the support level to satisfy the immobilization needs of any patient.

Pressure, only where you want it.

Miami Lumbar relieves pressure over the spinous processes while applying an even pressure to the paraspinal musculature to ensure comfortable and effective healing.

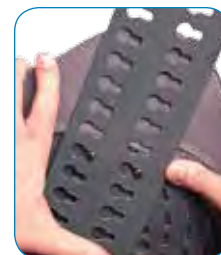

SLIM MODEL NOW AVAILABLE.

MIAMI LUMBAR® TLSO. SUPERIOR IMMOBILIZATION. MODULAR ADVANTAGE.

One for all.

Building on the modularity of the Miami Lumbar LSO, the TLSO Kit helps you reduce your inventory, while enabling you to properly and confidently fit nearly every patient you see. The Miami Lumbar universal belt, a selection of panels, and a T-Connector Kit are all you need on-hand.

Easy to fit.

Simply fit the Miami Lumbar LSO as you normally would. Then, set the desired height of the anterior and posterior thoracic extensions, adjust the twin-angle hinges and cinch down the trimmable shoulder straps to secure your patient in one of the most customizable off-the-shelf TLSO's available.

Successful outcomes.

As your patient progresses through different levels of healing, you can step-down the TLSO to a standard LSO brace, or remove the ATE and add the optional axillary shoulder straps to the PTE. Whatever level of immobilization you need to achieve, the Miami Lumbar TLSO accommodates you at every step.

Rehab Kit

COLD RUSH®

Cold Rush's holistic design features a durable motor, a stronger flow rate than the top selling units and an industry-leading ice-to-water ratio that ensures longer cooling times. Yet, it is whisper-quiet and compact, weighing just 4.6 lbs (2.1 kilograms).

Go with the flow. By incorporating the same durable motor used in much larger mobile air conditioners and refrigerators, Cold Rush provides consistent cooling and excellent compression, even to high elevations.

Quiet as a whisper. Cold Rush uses a brushless motor to produce a whisper-quiet (30 decibel) unit that allows patients to get the rest they need to properly rehabilitate from their injuries.

Stay cooler, longer! The highest ice-to-water ratio in the industry and a design that produces less heat transfer from the motor to the water combine to ensure cold therapy pain relief for up to 6 continuous hours.

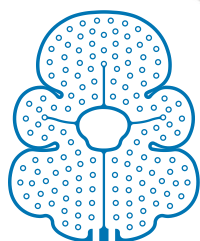

No igloos! Far more than just a modified beverage cooler, Cold Rush was designed holistically, with unique features like a locking lid to help prevent spills and insulated walls for improved cooling.

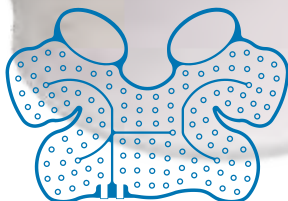

INDICATIONS

- For cold therapy pain relief, as needed

DH OFFLOADING POST-OP STYLE SHOE

- Designed to accommodate either the left or the right foot
- Designed around Össur's patented Active Offloading Insole
- Designed to accommodate bulky dressings
- Super-soft nylon upper with reinforced heel counter provides extra comfort and stability
- Patented removable toe piece aides in wound accessibility for daily wound site inspection
- Semi-rigid rocker bottom outsole

INDICATIONS

Designed for use in the treatment of plantar wounds, this shoe can be an excellent alternative to post-op style shoes with static pads (wool, felt, foam, etc.). It accommodates the ambulatory and compliant patient for short-term treatment (1 to 4 months).

PUSH-BUTTON CRUTCHES

- Aluminum construction is lighter than wooden models
- Double extruded center tube provides more load-bearing strength
- Special footpiece utilizes durable rivets to secure the aluminum tubing from the inside, providing more stability than plastic connectors
- Patented I-beam center post limits footpiece rotation to a 1/4 turn, keeping the push-button in view during adjustment
- Long, unbreakable stair deflector protects against the crutch slipping on stairs and helps increase stress tolerance at all angles without cracking
- Non-skid rubber tips provide good traction. Built-in metal ring prevents excessive wear and ensures durability
- Packaged completely accessorized, no assembly required 250 lb. capacity

TECHFORM® ORTHO-ROLL®

Developed in collaboration with orthopaedic professionals, Techform Ortho-Roll represents the first major breakthrough in orthopaedic splinting technology in decades.

In focus groups, Techform Ortho-Roll rated from "Good" to "Excellent" in every key category, including handling, conformability, padding, water retention, dispensing method, ease-of-use, overall appearance, and overall satisfaction. Techform Ortho-Roll simply performs better.

QUICKDRY™

Quickdry is a patented, revolutionary orthopaedic padding material. Quickdry padding never really stays wet. Water simply passes straight through it. The result is less risk of skin maceration. Plus, it saves you application time.

TECHFORM® PRE-CUT SPLINTS

Techform Pre-Cut Splints have the same key features as our patented Ortho-Roll splinting material, including our patented Quickdry padding. Each splint comes pre-packaged in an individual foil pouch, perfect for those who prefer to eliminate waste of splint material.

Our selection includes 8 sizes, a full variety of lengths and widths to accommodate all your splinting needs.

Pre-cut splints come in various lengths so you can choose the appropriate size to match your specific needs

CLASSIC HEEL CUPS

Tuli's double-ribbed classic heel cups provide 50% more protection than our previous model and provide relief from the everyday pain of heel strike. Worn in your shoes, Tuli's classic heel cups will help prevent sore heels and knees, shin splints and heel spurs. They will also relieve arch, ankle, leg and back pain that results from everyday heel strike.

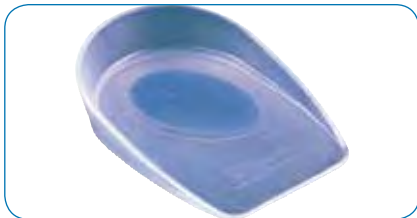

PART#	DESCRIPTION	U/M
2110	Regular - Under 175 lbs.	1 pair
2111	Large - Over 175 lbs.	1 pair

HEAVY DUTY HEEL CUPS

TULI'S Double-Ribbed Heavy Duty Heel Cups are the most advanced shock absorbing heel cups available today. The primary force of the heel strike is absorbed by the larger and higher waffle pattern while the lower and denser waffle pattern absorbs the "high pressure" and final force spike of heel strike. Perfect for sports activities.

PART#	DESCRIPTION	U/M
2113	Small - Under 80 lbs.	1 pair
2114	Regular - Under 175 lbs.	1 pair
2115	Large - Over 175 lbs.	1 pair

WONDERSPUR™

This oval-shaped soft durometer, placed medially, can aid calcaneal spurs, plantar fasciitis, heel spurs, and knee / back pain.

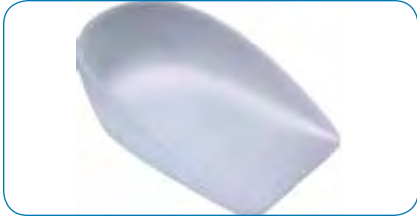

PART#	SIZE	MEN	WOMEN	U/M
SLS4500	Small	2-4	4-5	1 pair

GELSTEP® FIRM-RECOVERY HEEL CUP

The firm-density silicone used in this heel cup efficiently absorbs impact and recovers quickly, providing uniform support and protection during sports and other high-impact activities. Retains shape and will not deform or degrade with use. Washable and reusable.

PART#	DESCRIPTION	U/M
T10219	Small - Under 80 lbs.	1 pair
T10217	Medium - Under 175 lbs.	1 pair
T10218	Large - Over 175 lbs.	1 pair

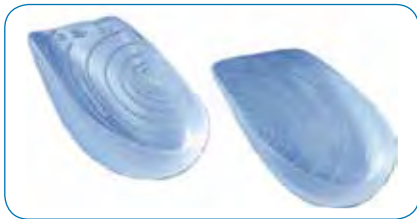

GELSTEP® INSOLES

High medial/lateral walls cradle soft rear-foot tissues, while "blue zone" areas of softer silicone provide spot relief under the heel area for maximum comfort. Raised pad of softer silicone in metatarsal area relieves pressure on metatarsal heads. Can be trimmed to desired size. Washable and reusable.

MDY10540	XLarge	11 - 14	13 - 16

UNIVERSAL GEL STRAP

A heart-shaped gel pad is comfortably positioned on the ball of the foot to cushion and protect the metatarsal. The gel pad is available both covered or uncovered. The toe stitch, which can be cut, enables placement between the toes for optimum fit.

PART#	SIZE	U/M
SLS10155	Sm / Med Uncovered	1 pair
SLS10165	Lg / XL Uncovered	1 pair
SLS10175	Sm / Med Covered	1 pair
SLS10185	Lg / XL Covered	1 pair

NATRACURE™ COLD THERAPY SOCKS

NatraCure Cold Therapy Socks come with gel packs that can be placed around the heel, ball, or top of the foot to provide targeted relief therapy for heel pain and plantar fasciitis. Also great for soothing tired, aching muscles, strains and sprains. The included gel packs can be refrigerated or frozen. Washable and reusable.

PART#	SIZE	U/M
SLS788	One size fits most	1 pair

COMPRESSION ANKLET

Reduces swelling for faster healing with less pain. Graduated compression from the toes to the calf ensures an increased venous activity. The spandex-nylon knit is soft and lightweight, providing an increased level of comfort and patient compliance. Recommended for foot surgery, fracture rehabilitation, ankle sprain, and non-specific foot or ankle swelling.

PART#	SIZE	ANKLE CIRC.
PEF60202	Small	22-24cm
PEF60203	Medium	24-26cm

PEF60206	2XLarge	30-32cm

ACHILLES HEEL PROTECTION SLEEVE

This sleeve is ideal for pump bumps (Haglund deformity) and sore, fatigued, or injured Achilles tendons. The soft, comfortable gel pad protects the posterior of the heel from friction, while gently compressing and reducing pressure. Its slim profile design fits most footwear. Washable and reusable.

PART#	SIZE	U/M
SLS10385	Sm / Med	1 ea
SLS10395	Lg / XL Un	1 ea

MALLEOLAR PROTECTION SLEEVE

This sleeve can be used as a protective cushion around ankle bones, for relief of pressure build-up during high-impact sports, or as an undersleeve for lower-extremity orthotics. Mineral oil gel soothes and moisturizes skin on contact. Washable and reusable.

PART#	SIZE	U/M
SLS15005	One size fits all	1 ea

SPENCO® FOOTCARE PRODUCTS

Made exclusively with **Closed Cell Neoprene**. This unique cushioning system provides a soft “comfort bubble environment” to help absorb shock, reduce friction and improve overall foot comfort. Awarded the **Seal of Acceptance by the APMA**. Unconditionally guaranteed for one full year.

SPENCO SLIP-IN INSOLES

The original “green” insole. Years of proven use and high quality, synonymous with the name SPENCO®, our slip-in insoles provide long-lasting heel-to-toe comfort. Washable, trim to fit with scissors.

PART#	SIZE	MEN	WOMEN	U/M

Your skin is your body's first line of defense against the environment around you. The aloe vera gel which coats this glove naturally moisturizes and hydrates your skin, helping keep it soft and healthy.

ALOETOUCH® EXAM GLOVES

Certified by the International Aloe Science Council

This certification guarantees that the aloe vera gel in Aloetouch exam gloves meets the highest standards for product purity, thereby providing 100% of aloe vera's natural benefits.

Designed for People who Frequently Change Gloves

Hand washing and glove changes deplete your skin of precious moisture. Renew your skin with Aloetouch™ Ultra Exam Gloves, coated on the inside with pure, soothing aloe vera gel.

Aloe gel penetrates and helps moisturize dry skin. It soothes itching and brings relief to cracked, chapped hands. The aloe vera gel used in Aloetouch gloves is pure, cold-processed and free of oils.

C180 ROCKET | OTS

With a condensed size and Accutrac™ hinges¹ that are modified to more accurately track young knees, the C180 Rocket provides support for children with ligament instabilities. Its sleek, carbon fiber frame is heat-moldable² for customized fitting by O&P professionals and features our proven Total Support System™ that captures the tibia³, providing the brace-to-bone contact needed to effectively support the knee joint. An optional patella cup is also available for additional protection⁴.

INDICATIONS

- ACL, MCL, LCL, PCL, rotary and combined instabilities
- Recommended for low to medium contact/impact
- Recommended for children

ACCESSORIES

Circumference: just below the distal border of the patella

PEDIATRIC WALKER

Pediatric Cam Walkers are designed to stabilize and protect the lower leg, ankle and foot. They are easy to operate and comfortable to wear, making them ideal for an active child who requires stability following a sprain, stress fracture, or surgery.

- High quality rigid outer skeleton for protection
- Dense foam lining within the sole to provide comfort and support
- Shock absorbing sole to improve comfort and protects the user from slips, providing additional security in each step
- Rocker bottom to stimulate natural gait
- Uprights give additional stability by restricting motion of the leg
- Lightweight design perfectly designed for kids to keep active

AIRFORM® STIRRUP ANKLE BRACES

Our Airform Ankle product family offers three different/unique alternatives for the pneumatic treatment of acute ankle injuries. All three Airform products utilize our “Flex-Edge” technology to eliminate the pressure points caused by traditional stirrups and create a more comfortable experience for patients.

INDICATIONS

- Acute ankle injuries
- Post-cast and post-walker support
- Chronic instability

Airform Universal Inflatable

- Universal design fits both left and right ankles, reducing inventory
- Soft Flex-Edges provide a universal fit without sacrificing comfort or stability
- Inflatable air bladders provide adjustable pneumatic compression
- Adjustable heel strap allows for easy width adjustment

PART#	SIZE	COLOR	U/M
802516	Youth/Pony	White/Grey	6 pack
80251	Youth/Pony	White/Grey	1 ea

Airform Inflatable

- Inflatable air bladders provide adjustable pneumatic compression
- Adjustable, pivoting heel strap increases comfort and allows for full range of motion
- Designed specifically to fit either the left or the right ankle

PART#	LEG	SIZE	U/M
70201	Right	Youth/Pony	1 ea
70200	Left	Youth/Pony	1 ea

Airform Pre-Inflated

- Pre-inflated, pulsating air bladder with regulated chambers reduces bottoming out and decreases edema
- No straws, or over-inflation
- Adjustable, pivoting heel strap increases comfort and allows for full range of motion
- Designed specifically to fit either the left or the right ankle

PART#	LEG	SIZE	U/M
70101	Right	Youth/Pony	1 ea
70100	Left	Youth/Pony	1 ea

A size 6 Oval-8 splint fits both a size 6 and 6.5 depending on which end of the splint slides on the finger first

Oval-8 kit

OVAL-8® FINGER SPLINTS

Treat six of the most common finger conditions with just one splint

Oval-8 finger splints stabilize and align the PIP and DIP joints. With a simple turn of the splint, each Oval-8 finger splint can be used six different ways to treat tendon or ligament injuries, protect healing fractures, control unstable joints, prevent contractures and more.

PART#	DESCRIPTION
W-510082	Oval-8 Pediatric Kit (3 ea. splints size 2 thru 7)

PADDED STRAP SHOULDER IMMOBILIZER

- Padded pressure sensitive straps improve comfort
- Waist strap is easily adjusted or can be removed
- Deep pocket design
- Two adjustment points for each strap allows for better fit
